

# UPDATE

November 2006

Since our last “Update,” 70 new patients have been enrolled. November Update statistics reflect activity through October 31, 2006. Once again, we thank all the paramedics who made a call to the enrolling doctor. Whether or not the patient was ultimately enrolled, every attempt is important to the outcome of the study. Of particular note in these statistics is the time from symptom onset to start of study drug. While the average in recent neuroprotective studies is 4 1/2 hours, the average achieved by the FAST-MAG paramedics is 46 minutes—an unprecedented number. Great job!

### Enrollment Updates

Number of Patients Enrolled = 218  
 Number of Enrolling Hospitals = 41  
 (see back of page for a complete listing)

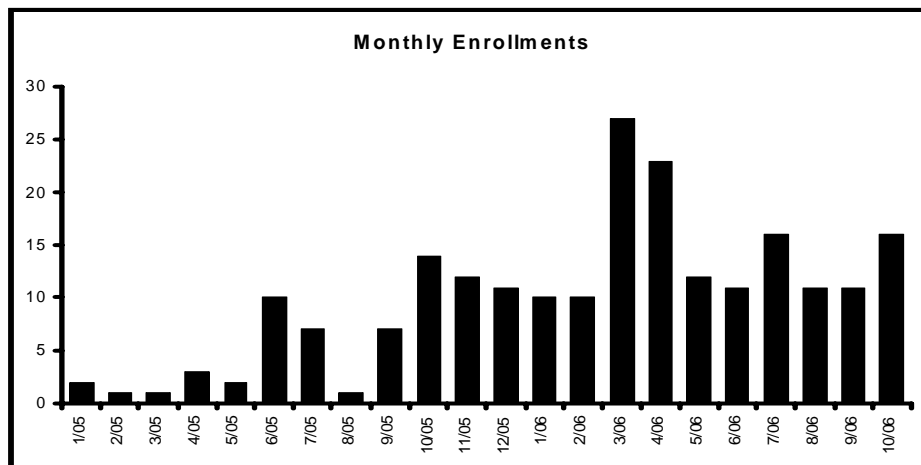

### FAST-MAG Enrollment Numbers

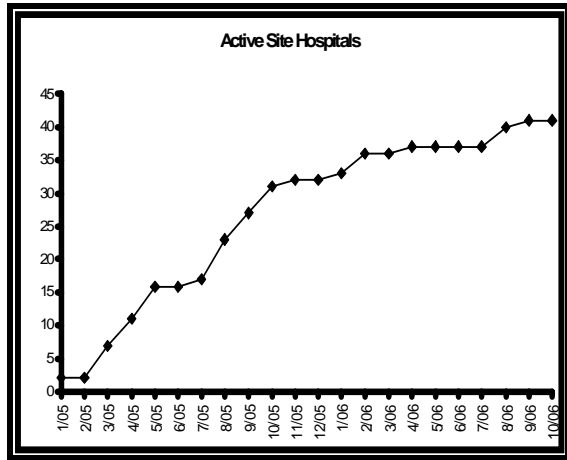

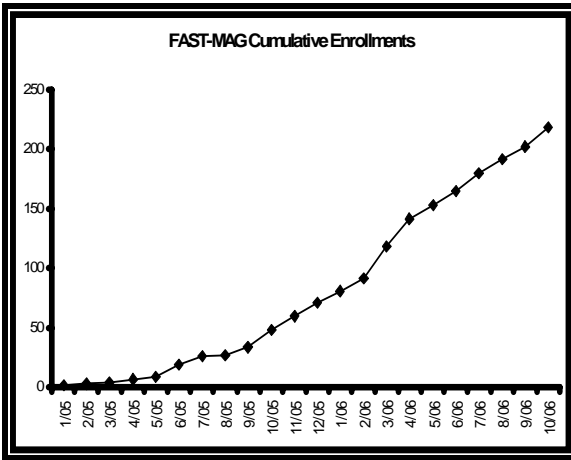

- Average time from paramedic arrival at patient to ED drop-off = 35 minutes.
- Average time from stroke onset to start of study drug = 46 minutes.
- % of patients receiving study drug within one hour of symptom onset = 70%
- % of patients receiving study drug within 1-2 hours after symptom onset = 24%.

### Enrollment by EMS Agency
