Got Results?

A question we hear frequently is “Do you have any results yet?” The answer is “yes and no.” What we do know is that the FAST-MAG Data Safety & Monitoring Board (DSMB) – a group of independent scientists appointed by the National Institutes of Health – reviews the study results twice a year and they continue to inform us that it is safe. We won’t know if magnesium sulfate helps stroke patients until a few months after the 1,700th patient is enrolled.

Monthly Enrollments

May 2011 was a record breaking month for enrollments: 42 patients entered the study!

Do You Know the **Ten Quick Steps** to a **FAST-MAG** Enrollment?

1. Identify potential stroke patient and perform LAPSS
2. If LAPSS positive (all items are yes), determine destination
3. Find hospital specific consent
4. Introduce the study to the patient or representative
5. If patient interested, call the enrolling MD; keep family/friends close by
6. MD explains the study and obtains consent
7. When the MD says to do so, have the patient or representative sign and date the green pages
8. When the MD gives you the order, hang the **GREEN** field dose
*** Must begin field dose before crossing the ED threshold ***
9. Complete the transport
10. Give ED RN the informed consent, the **YELLOW** bag, the completed LAPSS (front and back) and a legible copy of the run sheet
